REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-16 is the inclusion of an information acquisition unit that, based on the identification information obtained from a storage medium of a replacement part through the communication unit, acquires information on the replacement part from a storage unit provided to an element other than the replacement part; and a management unit that manages a usage state of the replacement part in accordance with the information on the replacement part acquired by the information acquisition unit. This is found in all of claims 1-16, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 17-32 is the inclusion of a control unit that obtains information on an operating state of the image forming apparatus. The operating state includes information stored in a storage medium, transmits the information on the operating state of the image forming apparatus through the network to the management server, and manages the operating state of the image forming apparatus based on the data sent from the management server, wherein the information includes usage state of the at least one replacement part. This is found in all of claims 17-32, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 33 is the inclusion of a method of storing identification information inherent to the replacement part into the storage medium of the replacement part; in correspondence with the identification information,

storing information for managing a usage state of the replacement part into a storage unit provided to an element other than the replacement part. This is found in all of claim 33, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 34 is the inclusion of a method of reading an identification information of the replacement part stored in the storage medium of the replacement part; based on the identification information read from the replacement part, acquiring the information on a corresponding replacement part stored in a storage unit provided to an element other than the replacement part; and based on the information on the corresponding part acquired from the storage unit, managing a usage state of the replacement part. This is found in all of claim 34, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
